The Social Cognitive Systems Group at Bielefeld University invites applications for a:

**** Full Researcher Position (TVL E13 100%, duration 3 years) in AI for Medical Social VR at Bielefeld University, Germany ****

The position is part of a newly funded project „DigiDi 2.0“ that studies how interactive avatars in Social VR can be utilized for diagnosing communicative disorders after brain inquiry. The project is highly interdisciplinary and carried out in cooperation of the University of Cologne and Bielefeld University (Faculty of Technology/CITEC and Faculty of Linguistics). The present position is located at the Faculty of Technology (Social Cognitive Systems Group, Prof. Dr. Stefan Kopp) and targets the development of advanced AI models to simulate face-to-face interaction between a 3D avatar in VR and a patient. Recording and analyzing interaction data for diagnostic purposes is also a potential topic for this position to work on. The project will start in October 2026 and runs for 3 years.
