

Do you have

Good programming skills in Python and C?

Do you

Want to work in a climate research project?

We are looking for a

Student assistant on master level

for a third-party funded project in the German National Climate Modeling Initiative *PalMod*.

Your task will be to work on parallel-in-time methods for ocean simulations. You will use an existing ocean simulation model and perform test runs with different configurations on high-performance hardware. You need to be self-motivated and capable to go into the depth of real-world simulation software.

The scope and duration of the activity is adjustable. It can start as soon as possible.
